To Whom it my Concern,

I'm a user of IBM OS/2 Warp and have had nothing but problem with Microsoft products. I believe Microsoft has too much of a strong hold on all "Vendors & Public".. The Last copy of Microsoft product " XP " that my son bought won't even use "NetBeui" correctly to work with my home Network. Which consist of OS/2 Warp v4 & eComStation. There has to be something done to stop this Strong hold happening. I think all Operating System should be able to be " Compatible " with all products that exist with computers.

"I DON'T AGREE"

Later,  
Jerry Nichols
